

FETCO ICI Compared to SET Index

FETCO Investor Confidence Index (FETCO ICI) for January 2026 report- surveyed between 19–31 December 2025 and reflecting market expectations over the next three months—rose back into the “bullish” zone at 156.60. The local political situation was identified as the most supportive factor, followed by fund inflows and expectations of a Federal Reserve policy rate cut. Nevertheless, confidence continues to be constrained by the Thai economic slowdown, Baht volatility, and ongoing domestic political uncertainties.

Most attractive sector is Banking (BANK), followed by Tourism & Leisure (TOURISM) and Transportation & Logistics (TRAN). Meanwhile, investors view Fashion (FASHION) as the least attractive sector, with Printing & Publishing (MEDIA) and Steel & Metal Products (STEEL) also ranking low in appeal.

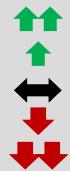

Confidence of retail investor is in “neutral” zone. Confidence of proprietary and institutional investors is in “bullish” zone while that of foreign investors is in “very bullish” zone.

FETCO INVESTOR CONFIDENCE INDICES

RETAIL ICI	102.67	↔
PROPRIETARY ICI	140.00	↑
LOCAL INSTITUTES ICI	133.33	↑
FOREIGN ICI	200.00	↑↑

FETCO ICI Criterion

(160 - 200)	Very Bullish
(120 - 159)	Bullish
(80 - 119)	Neutral
(40 - 79)	Bearish
(0 - 39)	Very Bearish

Note: Investor Confidence Index surveys four groups of investors—retail investors, local institutional investors, proprietary trading group, and foreign investors—using a diffusion index with a range from 0 to 200. The index readings are divided into five levels: very bullish; bullish; neutral; bearish; and very bearish.

Trends in Investor Confidence by Type of Investor

■ November 2025 ■ December 2025

The **December 2025 survey** results indicate a broad-based improvement in investor confidence. Retail investor confidence increased by 8.2 percent to 102.67, while proprietary investor confidence rose by 12.0 percent to 140.00. Institutional investor confidence advanced 12.8 percent to 133.30, and foreign investor confidence surged 100 percent to 200.00.

During December, the SET Index trended downward, pressured by several factors including domestic political developments following the dissolution of the House of Representatives, tensions along the Thai–Cambodian border, and global equity market volatility triggered by a sell-off in U.S. large-cap technology stocks. Trading activity was also subdued as the year-end holiday period approached. Nonetheless, market sentiment was supported by positive developments, notably clearer political prospects following the announcement of a new election date, the Bank of Thailand's 25-basis-point policy rate cut to 1.25 percent, and the Federal Reserve's 25-basis-point rate cut to a target range of 3.50–3.75 percent. By month-end, the SET Index closed at 1,256.67, largely unchanged from the previous month, with an average daily trading value of THB 31,474 million. Foreign investors were net buyers of THB 6,202 million in December, although they remained net sellers of THB 107,097 million year to date.

Key external factors to monitor include clearer guidance on policy rate trajectories from the Federal Reserve and other major central banks, which directly influence Baht movements and foreign capital flows, as well as the global and Chinese economic outlooks that are critical to Thailand's export sector. Geopolitical risks—including tensions between the U.S. and Venezuela, China and Taiwan, and Thailand and Cambodia—also warrant close attention. Domestically, important factors include measures to address Baht appreciation and its impact on exports, the consistency and effectiveness of government economic policies, progress on major investment projects, post-holiday private investment activity, and upcoming earnings announcements from listed companies.

Note: The domestic institutional group includes asset management companies, government pension fund, insurance companies and life insurance.
